

DOG-ON-IT PARKS

DOG-ON-IT-PARKS.COM

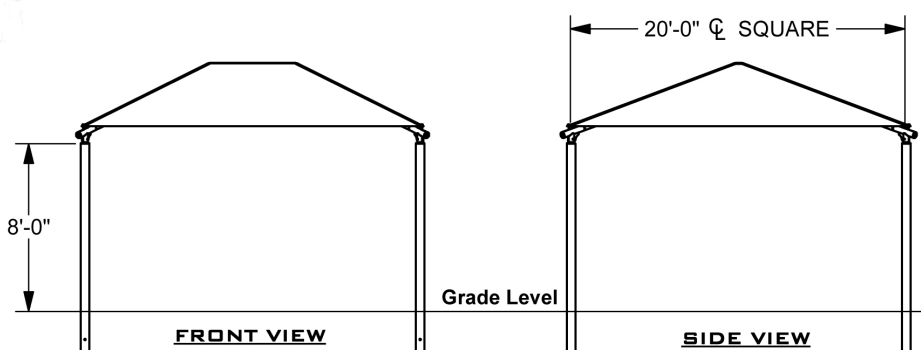

This option offers a generous 400 square feet of protection from the elements with ALNET UV stabilized, high density polyethylene fabric which blocks up to 97% of harmful UV rays and heavy duty steel support frames. For more blustery regions, shelters have a warranted wind rating up to 76 mph and gusts (3 seconds) of 90 mph, and the handy glide elbows mean the fabric can be removed quickly and safely in the event of severe weather.
